University of Fribourg

Facts and Figures

University of Fribourg is Switzerland’s only bilingual university. Bachelor, master and doctoral degrees can be completed in French, German or a combination of both, with additional classes taught in English at the master’s level.

Studying in the medieval town of Fribourg, students find themselves surrounded by a beautiful landscape, with remarkable historical and cultural depth; they also experience the special flair of a true university town, with nearly 10,000 students from around the world, making up a large proportion of the town's 40,000 inhabitants.

Faculties
- Departments of Theology
- Department of Law
- Department of Economics and Social Sciences
- Department of Arts
- Department of Sciences

Interdisciplinary research
- Environmental Sciences
- Competitiveness
- Ethics and Human rights
- Informatics
- Multilingualism
- Nanoscience

Participation in NCCRs
- Affective sciences
- Interactive Multimodel Information Management
- Kidney control of homeostasis
- Materials with Novel Electronic Properties
- Mediality: Historical Perspectives
- Molecular Oncology
- Neural Plasticity and Repair

Collaboration with China

Institutional agreement and exchange agreement
- East China University of Political Sciences and Law (political sciences, law)
- East China Normal University Shanghai
- China Foreign Affairs University (international law)
- University of Electric Science and Technology China (MOU, student exchange in computer science, business administration)
- Beijing Foreign Studies University (MOU, student and faculty exchange, collaboration in law, economics and language education)

Research collaboration
- Department of Physics, China University of Science and Technology
- Alibaba Research Center for Complexity Sciences, led by Prof. ZHANG Yicheng from University of Fribourg
